DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35U.S.C. 121:

Group I: claim 1, 4-14, drawn to with particular telemetric coupling 340/445.

Group II: claim 2-3, 15-36, drawn to with particular telemetric coupling 340/445.

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 06.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it relates to sensing tire temperature with sensor disposed on the sidewall of tire. The subcombination has separate utility such as sensing temperature on support structure or rim of a tire with sensor disposed on the structure.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art, as well as their recognized divergent subject matter and the search required for Group A is not required for Group B, restriction for examination purposes as indicated is proper.

Art Unit: 2612

4. Telephone calls were made to attorney David T. Nikaido on 7/16/2007 to request an oral election to the above restriction requirement. But the election was not made. The statutory period of reply is set to expire 1 month or thirty days, whichever is longer, from the mailing of this communication.
